Automation and AI: GoHighLevel, Make, n8n, Zapier, ChatGPT, Claude Code, Codex, Gemini, GitHub Copilot, Cursor

Tools and Delivery: Git, GitHub, GitLab, CI/CD, Linux, cPanel, VS Code, Figma, GA4, Search Console, Tag Manager, technical SEO

PROFESSIONAL EXPERIENCE

Full Stack Developer | Golden Pencil

November 2024 - Present | Quezon City / Remote

- Develop and maintain PHP and WordPress applications for client websites and internal operations.
- Built a budget request platform that centralized submissions, departmental approvals, expense tracking, reporting, and access control.
- Developed an inventory and asset platform covering stock monitoring, checkout and endorsement workflows, approvals, and user permissions.
- Created a queue management system with ticket generation, kiosk registration, service selection, real-time serving displays, and multi-counter workflows.
- Integrate third-party APIs, troubleshoot production issues, and provide technical support for online and on-site events.

Full Stack Web Developer | Inext Software

April 2024 - September 2024 | Muntinlupa / Remote

- Developed and maintained Laravel applications, database integrations, and deployment workflows for business and client requirements.
- Modernized legacy Laravel systems by restructuring code, resolving defects, and improving maintainability.
- Redesigned web interfaces and delivered customized WordPress themes, plugins, page layouts, and backend features.

Junior Programmer | Prestige Interactive

August 2023 - April 2024 | Ortigas

- Managed large directory datasets using SQL, CRM tools, and HeidiSQL, maintaining accurate business and location records.
- Maintained website content, advertising layouts, and Laravel-based directory deployments.
- Supported map plotting and location-based data management for online directory platforms.

EDUCATION

Full Stack Web Development Bootcamp | KodeGo | 2022 - 2023

Bachelor of Science in Mechatronics Engineering | Batangas State University | 2014 - 2019
