

## Full Stack Developer | WordPress Developer | AI Automation Specialist

---

### Professional Profile

---

Full Stack Developer with 3+ years of experience building web applications, WordPress sites, and internal business systems. I work across PHP, Laravel, JavaScript, databases, APIs, and workflow automation, with a practical focus on making day-to-day work easier for users and teams.

### Core Skills

---

**Web Development:** Laravel, PHP, React.js, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap

**CMS and E-commerce:** WordPress, WooCommerce, custom themes, plugin customization

**Automation:** Make.com, n8n, Zapier, HighLevel, OpenAI, Gemini, webhooks

**Backend and Data:** REST APIs, MySQL, PostgreSQL, MongoDB, database design, reporting

**Tools:** Git, GitHub, GitLab, CI/CD, Linux, Windows Server, cPanel, VS Code, Figma

### Professional Experience

---

#### Full Stack Developer - Golden Pencil

November 2024 - Present | Quezon City / Remote

- Develop and maintain PHP and WordPress applications for client websites and internal business needs.
- Built a budget request system with request submission, departmental approvals, expense tracking, and reporting.
- Developed an inventory management system with asset tracking, stock monitoring, checkout and endorsement workflows, approvals, and user access control.
- Created a queueing system with ticket generation, kiosk registration, service selection, real-time serving displays, and multi-counter support.
- Integrate third-party tools and APIs, troubleshoot production issues, and provide technical support during online and onsite events.

#### Full Stack Web Developer - Inext Software

April 2024 - September 2024 | Muntinlupa / Remote

- Developed and maintained Laravel-based web applications for business and client requirements.
- Updated legacy Laravel systems, improved maintainability, and implemented database integrations and deployment workflows.
- Redesigned website UI and UX and built customized WordPress sites, themes, plugins, and backend features.

#### Junior Programmer - Prestige Interactive

August 2023 - April 2024 | Ortigas

- Managed and updated large directory databases using SQL, CRM tools, and HeidiSQL.
- Maintained website content, advertisements, layouts, and Laravel-based directory deployments.
- Handled map plotting and location-based data management for directory platforms.
